### MDA200

Belonging to our UC Enabler category, the MDA200 headset communication hub allows a corded or wireless USB headset to connect to and switch between calls from both PC and desk phone. (83757-02).

For a list of Plantronics headsets that are compatible with MDA200, visit [plantronics.com/configurator](http://plantronics.com/configurator).

### TECHNOLOGY LEGEND

#### A2DP

A Bluetooth® profile that allows high quality audio content to be streamed from one device to another. Listen to streaming media, music and navigation through your headset.

#### Active Noise Cancelling (ANC)

Technology that reverses surrounding sound waves to cancel low frequency noise in order to isolate and minimise ambient noise the user can hear.

#### Adaptive Power

Automatically downshifts to low power when the wireless headset is close to the base to save battery life and maximise density.

#### Dynamic EQ

Optimises voice quality on calls and automatically adjusts EQ settings when listening to music or for multi-media playback.

#### Hi-fi Stereo

Full-range dual channel audio playback capable of frequencies from 20 to over 20,000Hz.

#### Immersive Audio

Specially designed ear cushions and headband reduce background noise and allow you to focus.

#### Smart Sensor Technology

Built-in sensors deliver automatic functionality like answering a call by placing the headset on and automatically transferring calls between mobile phone and headset.

#### SoundGuard

Acoustic limiting for protection against sounds above 118 dBA.

#### SoundGuard DIGITAL

All the benefits of SoundGuard, plus anti-startle protection which detects sudden increase in sound and eliminates the increase, and Time Weighted Average (TWA) measurement which prevents average daily sound exposure from exceeding 85 dBA.

#### Wideband

Frequency range up to 6,800 Hz. Meets TIA-920 standard for genuine wideband response.
